2012 FIRST CONTACT TO THE **AUTOMOTIVE INDUSTRY**

1991 MOVE TO KUPFERBERG

Since the founding of our company Müller Plastik GmbH we are dealing exclusively with cables and cable assemblies in the area of plug connection cables as well as due to our own tool making also in the field of special plug cables

The company Müller-Plastik GmbH was founded on 06.01.1980 by Elmar and Marlies Müller in Lüdenscheid.

Due to the reason that there was no option for expansion in the Lüdenscheid site, the family started with the construction of the present production facility in Kupferberg in 1990.

In 1991 the company moved with about 40 employees to Kupferberg. An area of 3,500 m² was now available.

Michael Müller takes over the commercial management and enters the company as a partner.

The product range has been continuously expanded in the following years. To the actual cable assembly an own toolshop with a design department was added. This made it possible to offer a better response to customers requests and to deliver special plugs and various molded parts.

Müller Plastik offers complete solutions, from the design, the tool manufacture to series production all in one house.

In the previous years further milestones have been reached, such as the first ISO 9001 certification by TÜV Rheinland. Due to a further positive trend in the following years, the number of employees was exceeded to 100 for the first time

Terms like quality, flexibility and reliability are very important in the company.

Based on our over 30-years of experience in the production of power cords, we set ourselvs the task to find suitable products for the megatrend electromobility. In close co-operation with partners and customers we have developed fitting solutions for the "home-charging".

Many well-known automobile manufactures use our worldwide released and certified power cords with temperature control in their Mode 2 charging cables.

Primary objective of the extension was the improvement of the production process in the business units Industry, Automotive and pluggable electric installations. Shorter internal transport distances and an optimized quality control are just two examples of the overall optimization. With the improvement of the entire manufacturing process, specific capacities for further custom products such as plugs, plug-in-devices, moulded grommets or connectors according to individual customers specifications have been created.

• ISO CERTIFICATION DIN ISO 9001:2015

• TURNOVER OF 18 MIO. EUR / YEAR

• OWN TOOL SHOP
WITH CONSTRUCTION DEPARTMENT

• OWN TEST LABORATORY

• OVER 1.000 ACTIVE GLOBAL CUSTOMERS

• MORE THAN 2.500 m² STORAGE&DISPATCH AREA

CUSTOM PRODUCTS

IP20 and IP44 **Safety plugs** in straight and angled design.

connector plugs & appliance connectors in straight and angled design.

IP20 and IP44 **Contour- and Euro flat plugs** in straight and angled design.

IP20 and IP44 **Sockets**
